# Fresh Inspiration Inside

When you have been growing hanging basket recipes for years, it's easy to fall into a rut and grow the same plants every year. Yet, today's consumers are looking for something unique that will set them apart. Are you ready to meet the challenge and try something new?

In the next 32 pages, you will find container recipes that build upon popular purples and pinks and shine in eye-catching shades of blue, red, yellow and orange. Recipes centered around fantastic foliage plants are also new. Challenge yourself to broaden your recipe palette and you'll find your product appeals to a more diverse audience.

Three new workhorse Supertunia® petunias are featured prominently throughout this guide: Supertunia Hoopla™ Vivid Orchid™, Saffron Finch™ and Bermuda Beach® Improved. Tried and selected for proven performance, these gorgeous, durable petunias have earned their place in the all-star series.

Proven Winners propagators extensively trial and grow the recipes they recommend. Acres of research are conducted annually from early spring through fall, evaluating key traits like seasonlong flowering performance, compatibility, heat tolerance, weather endurance and more. These are recipes that have been proven to work. Get ready for some fresh inspiration!

## Easy Order Hanging Basket Kits

**CHOOSE:** Select from the extensive list of kits available from Proven Winners propagators.

**RECEIVE:** Each of the ingredients for the recipes, one tray per variety.

**LABELING:** Each kit includes a matching recipe specific container garden tag designed to increase brand recognition and drive impulse sales.

**EXCLUDED:** Since branded containers are only needed for single small pot production, they will not be sent with kit orders.

# How to Design and Grow Premium Recipes that Sell

Container recipes are popular with home gardeners because they offer instant beauty and color in a convenient take-home package. So how do growers create the combinations customers love, and produce them as efficiently as possible? Here are seven tips from Brian Bourdon, Four Star Greenhouse's Senior Manager of Offsites & Crop Supply Chain, who has created hundreds of our most popular recipes.

## Pair Plants with Similar Vigor

One of the biggest mistakes people make when designing container recipes is not matching plants with comparable vigor ratings. When a high vigor plant like Supertunia Vista® Bubblegum® is paired with plants that are less aggressive, it quickly overtakes the other plants and sets the combination off balance. But when it is grown with other high vigor plants, the recipe grows perfectly together.

We've tested and rated all of our annual plants for vigor using a scale of 1 to 4. Pay close attention to these ratings when designing your own recipes. If you are following one of our named recipes, we've already factored vigor into account.

All three varieties in our **Feeling Happy** recipe are rated at Vigor 2, so you can be confident they will mix evenly in baskets.

## Match Cultural Needs

Growers are savvy at pairing plants with similar needs together in production to increase efficiency. The same rule applies when matching up plants in container recipes. Factors to consider include: lighting and shade requirements, moisture, nutrients, growing temperature and heat tolerance. Most annuals will perform well at a pH of 5.8-6.2, so this detail is less critical to examine.

Since *Lantana*, *Calypophus* and *Calibrachoa* all prefer full sun and like for the soil to dry down a bit between waterings, they are a good match for one another in our **Goldfish** recipe.

## Stretch the Imagination

Once your top-selling recipes are established, let's think beyond the standard 3-variety thriller-filler-spiller formula and create premium complex container recipes with higher price points. These can be sold in much larger, high quality decorative containers as cash and carry items.

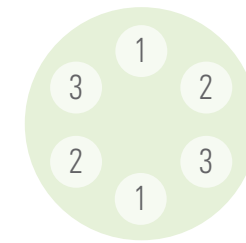

Container recipes are trending larger and more complex as people look to create fewer plantings with higher impact for their decks and porches. Choose an unconventional thriller like a large ColorBlaze® coleus, *Colocasia* or Upside™ climbing *Ipomoea*, then surround it with coordinating filler and spiller plants to create a dynamic mosaic of color and texture.

Our premium **Somewhere Secret** container recipe for part sun to full sun combines lush foliage plants with vibrant blooms. It includes ColorBlaze® Golden Dreams™ coleus, Surefire® Cherry Cordial™ begonia, Lemon Coral® sedum and Big Leaf creeping wire vine.

## Follow the Diagram

We provide planting diagrams for all our hanging basket and upright container recipes found in this guide and online. It's important to train your production department to follow these diagrams when transplanting liners into new hanging baskets and upright containers. This will ensure enough liners are used and that they are positioned to achieve the most attractive mix of colors and textures.

Following the planting diagram will ensure the container grows full and balanced.

## Easy Design Formulas

If you're looking for an easy way to combine plants in premium quality hanging baskets and upright containers, the thriller-filler-spiller method continues to be a success. Consumers have come to know and love this formula, too.

There are countless varieties that will work in these types of recipes – the hardest part is narrowing down your choices. Instead of a typical spike or grass, try something different this year and use a sunflower, caladium or canna as your thriller for a more premium finished product.

This **Grand Duchess** recipe follows the classic thriller-filler-spiller formula.

## Color Schematics

We all know that color sells. While pink and purple rank consistently as consumers' favorite colors, blue also ranks near the top of that list. Color preferences tend to shift through the seasons. While pastel pink is often sought after for spring recipes, bold magenta pink plays prominently in warm season combinations.

To accommodate the color preferences of a broad array of consumers, we've created container recipes in 15 different color schemes. From pastel to patriotic, vibrant mixes to earth tones and more, you'll find over 1,500 container recipe ideas at [www.provenwinners.com](http://www.provenwinners.com).

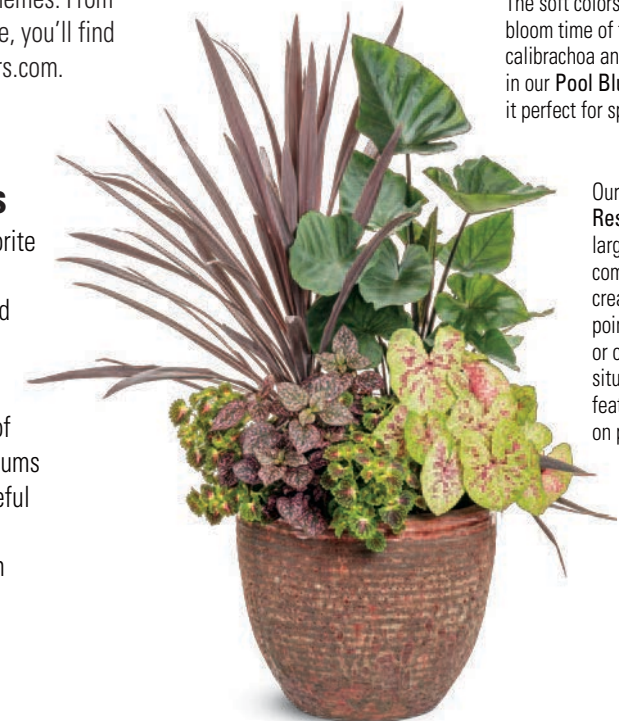

The soft colors and relatively early bloom time of the Superbells® calibrachoa and Laguna® lobelia in our **Pool Blue** recipe make it perfect for spring sales.

## Classic v. Unconventional Pairings

Your design and production staff surely has a list of favorite container recipes they grow beautifully every year. In addition to the classics, don't be afraid to branch out and try something a little less conventional that might appeal to a new, perhaps younger, audience.

As the popularity of houseplants grows, so do all sorts of plants with fun foliage like coleus, elephant ears, caladiums and cordylines. Colorful foliage plants are especially useful for shade gardens, and they often require less frequent feeding than flowering plants. Who needs flowers when you have fantastic foliage like this?

Our premium **Nature Reserve** recipe is a very large, eye-catching combination that would create a dramatic focal point at a front entrance or on a patio, perhaps situated near a water feature. Find details on page 32.

# 6 Critical Production Tips

Want to produce lush, flower-covered container recipes like those you see in this guide? Lead growers from our propagation facilities share their top tips.

## 1 The Key to Success

Starting with exceptional quality liners is the most important thing you can do to get your container recipes off to a great start. Even if you encounter issues along the way as you produce your crop, they will be far easier to navigate if you start with quality liners. Your propagator will be happy to work with you to determine the best liner size and delivery date to fit your production model.

Starting with robust liners is the key to success in growing premium quality container recipes. Work with your propagator to determine the best liner size to fit your needs.

## 2 Start Your Liners Off Right

Minimizing stress on newly planted liners will avoid complications down the road. As a standard practice, we apply a preventative broad spectrum fungicide drench one week after transplant to all newly transplanted liners. This protects their roots from potential attacks.

## 3 Moderate Your Watering

It is very easy to overwater newly transplanted liners, so take care not to create this unnecessary stress. During the first few weeks after transplant, the root system is still small and does not yet extend down the bottom of the container. At this time, frequent but low volume water applications are required to provide the liners just the right amount of water they need without becoming overly wet.

Drip lines allow maximum control over irrigation, ensuring liners are not over- or under-watered in production.

## 4 Build a Strong Foundation

When your liners are young and are newly transplanted into hanging baskets, focus on developing a strong root system for the plants. Timing is key. We closely monitor the growing temperature, pH and EC of the growing media, and fertility while the plants are becoming established in the container.

## 5 Trimming and Shaping

As the plants are growing, a series of pinches and/or PGR applications are used to shape the plants in the containers. For many plants, we trim around the edges of the containers as needed, prior to spacing uprights and hanging the baskets. PGR rates are listed on our website for all of the plants we offer.

Trimming plants around the edges of the containers before spacing will make it easier to lay them out properly on the floor.

## 6 Feed Those Plants!

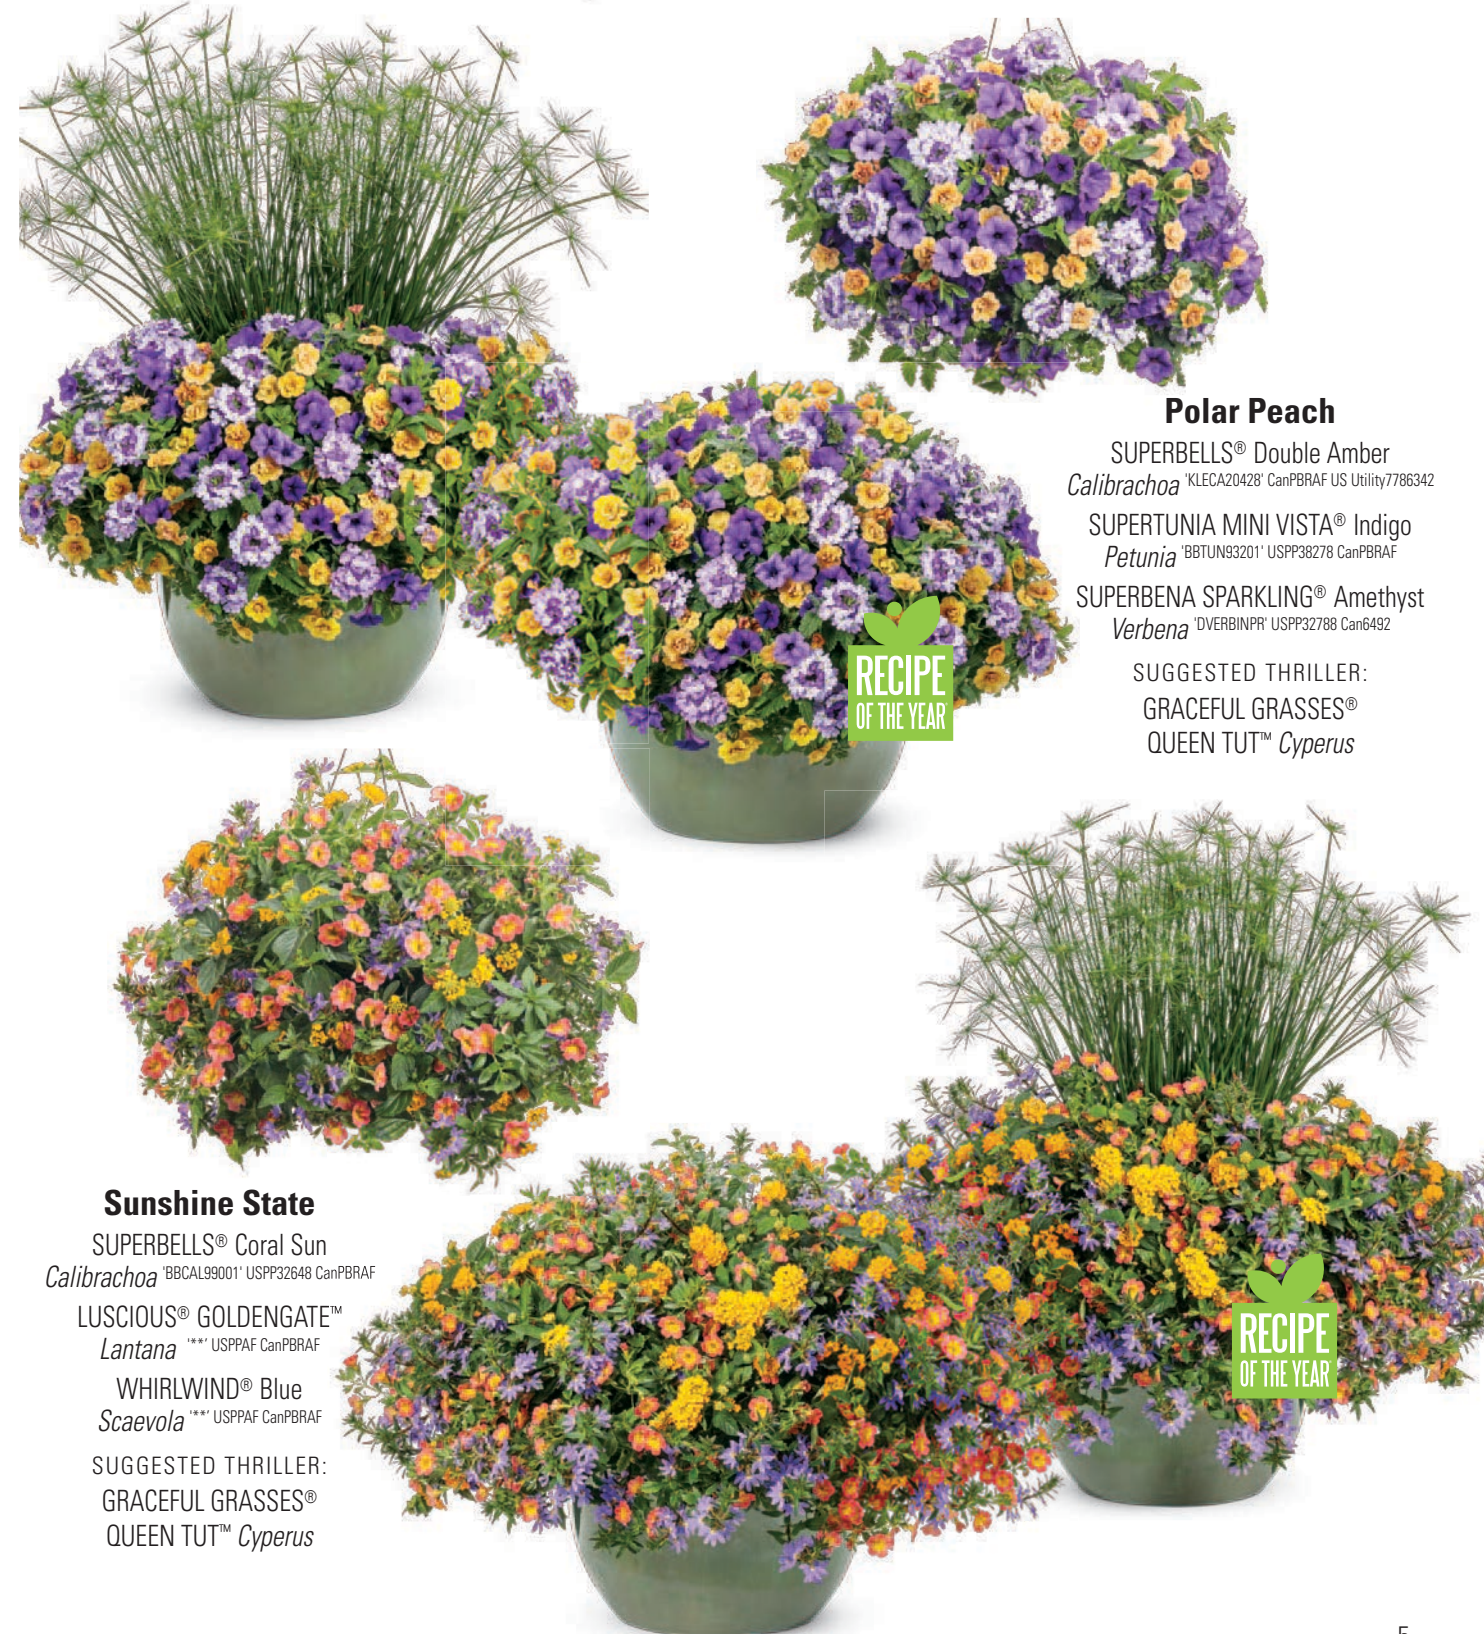

Premium quality hanging baskets and upright containers will fly out of inventory, so be sure you are feeding those hungry plants so they reach their full potential. We've developed four primary and four specialty professional fertilizer products that will help minimize and correct pH-related issues in your production greenhouses. We'll help you select the right product for your situation based on your water test results. All of our fertilizers contain minors and 100% EDDHA as the source of iron.

The eight professional fertilizers we offer can be used with every irrigation. The formula you will use is based on your specific water conditions or needs.

# The New 2024 National Recipes

Packed with our top-selling, most distinctive varieties, our National Recipes have been proven in trials to work. We'll take care of driving consumer demand while you watch them fly out of inventory.
